

Biography
LORI J. DOTSON

Ms. Dotson is a Senior Member of the Technical Staff in the Environmental Decisions Department at Sandia National Laboratories. She has an M.S. in Hydrology and a B.A. in Geology and nearly 20 years of work experience. Ms. Dotson is currently conducting research on the emergency evacuation process in the U.S. and is also involved in homeland security projects dealing with radiological dispersal devices. She recently published two Sandia reports, an emergency response plan for transportation accidents involving radioactive materials and a Lab-directed research study on radiological dispersal devices. Ms. Dotson has managed a wide-range of national and international projects throughout her career, including probabilistic risk assessments for nuclear waste repositories, a radioactive materials incident reporting database, and several environmental contamination assessment/remedial action investigations.
