

Short Bio
Ronald G. Fraass
502 227-4543 ext 2222 rfraass@crcpd.org

Ron Fraass is the Executive Director, Conference of Radiation Control Program Directors, where he manages and directs a central headquarters office for CRCPD technical and program administrative activities. For several years he was Chair of the E-6 Committee for Emergency Response Planning of CRCPD before being elected to the Board of Directors and then hired as the Executive Director. He spent ten years with the Kansas Radiation Control Program as a Public Health Physicist with management responsibilities for the radon program, environmental radiation monitoring, and radiological emergency preparedness. He gained his first twenty years of professional experience in the Air Force with responsibilities for nuclear effects survivability, radiation safety, radiation effects testing, laboratory management, classroom education, and program management. Ron holds a B.S. degree in Nuclear Engineering from Kansas State University, Manhattan, KS and a M.S. degree in Nuclear Engineering from the Air Force Institute of Technology, Wright Patterson AFB, OH. He is a member of Sigma Tau, Tau Beta Pi, Phi Kappa Phi, Health Physics Society, American Nuclear Society, and the American Society of Association Executives.
