Dear Colleague:

Welcome to the 17th annual National Radiological Emergency Preparedness (NREP) Conference.

The purpose of the NREP Conference is to provide a professional forum for individuals and agencies involved in radiological emergency preparedness and response. The target audience is personnel from federal, state, and local emergency management agencies, radiological health programs, and nuclear power utilities.

As in the previous years, the Program Subcommittee has put a large amount of planning and effort into ensuring that the 2007 program covers a wide range of topics.

Your participation is valued and appreciated. I am confident that we will have a very useful and successful conference this year.

Thank you, once again, for joining us in fulfilling our professional obligation to maintain the effectiveness of the radiological emergency preparedness programs which protect our citizens.

Sincerely,

Anthony Marzano, Chair
Steering Committee 2006-2007
